# FIRE ACTIVITY

## Blue Cut, Vegetation Fire, San Bernardino County

### **Critical Infrastructure**

- Railroad
  - A railroad bridge was destroyed and a train trestle damaged in the Cajon Pass area as a result of the Blue Cut Fire in San Bernardino County. This transportation disruption is expected to continue until all repairs can be made. This bridge and trestle damage directly impacts the movement of goods to and from the Los Angeles area, including the Ports of Los Angeles and Long Beach.
  - Per Union Pacific, as of 08/20/16 at 1100 hours the trestle bridge is open and rail traffic will resume with speed restrictions.
- Pipeline
  - Kinder Morgan's approximately 550-mile CALNEV pipeline system transports gasoline, diesel and jet fuel from Los Angeles, Calif., refineries and marine terminals through parallel 14- and 8-inch diameter pipelines that originate in Colton, Calif., and extend to terminals in Barstow, Calif., and Las Vegas, Nev. The pipeline system also serves the Nellis Air Force Base in Las Vegas, NV, McCarran International Airport in Las Vegas, NV, and Edwards Air Force Base in the Mojave Desert in southeastern Calif.
  - This pipeline experienced a power outage as a result of the fire. On August 17, SCE secured a transformer and two (2) generators were delivered, and successfully obtained an environmental permit. As of August 18, Kinder-Morgan has received permission from USFS and San Bernardino County Fire permission to operate the generators. The generators are scheduled to be operational on 8/20/16.

### **Mission Tasking**

- **2016-FIRE-26034:** Request for 1 C-12 for aerial assessment and transport for Cal OES and CNG Leadership.
- **2016-LAW-26006:** 08/16/16, to support communication for LEMA requests for the Blue Cut Fire.

### **Utilities**

- Southern California Edison (SCE) continues with the following activities as reported on 08/19/16 at 2100 hours:
  - Approximately 314 customers are without power (294 customers on the Blue Cut circuit).
  - A damage assessment was conducted, which resulted in a total of 325 SCE poles damaged. The restoration began on 08/20/16 0600 hours.
  - SCE will begin to re-energize their lines today.
  - There was a problem with the circuit breakers on the generators but expect it to be repaired overnight. Restored power to pipeline pumps in the Cajon Pass is expected on August 20

- On 08/17/16, County Preliminary Damage Assessment (PDA) teams began assessing damages.
- Cal OES Regional staff will work with local governments to conduct Initial Damage Estimates (IDEs). Additionally, Recovery Staff requests (i.e. PA Debris Operations and/or PDA staff) must be requested through the Cal EOC mission tasking process. There has to be a demonstration that the expenses incurred are beyond the affected local government's capabilities (i.e. budgeted disaster recovery funds). Only after all of the above conditions have been met will a CDAA funding determination be made.
- The San Bernardino County Local Assistance Center (LAC) has a total of 27 County Departments supporting the LAC. The Shelter Operations Center (SHOC) has a management team on site and they are coordinating requests through San Bernardino County EOC.
- At the request of the county, the Department of Motor Vehicles was asked to participate in the SHOC to assist residents with replacing vehicle registrations and driver's licenses. Cal OES Individual Assistance is working with local government on any future LAC's.
- The United Way issued a Press Release on 08/19/16 announcing the Blue Cut Fire Relief Fund initiated by a \$100,000 donation by The Community Foundation which serves San Bernardino and Riverside Counties. Contributions to the fund will be used to provide relief to those affected by the fire. Donations can be made online at [www.IEUW.org/help](http://www.IEUW.org/help) or by texting RELIEF to 40403 or by check payable to Inland Empire United Way and sent to IEUW Fire Fund, 9644 Hermosa Avenue, Ranch Cucamonga, CA 91730.
- On 08/19/16, A Local Assistance Center (LAC) was opened. It is co-located at the SHOC. The hours of operation are:
  - Saturday, August 20, 2016 from 0800 – 1700 hours
  - Sunday, August 20, 2016 from 0800 – 1700 hours
  - The status of the LAC will be evaluated on Sunday.
  - On 08/20/16, 2 shuttle buses will begin to transport evacuees from the Jessie Turner shelter to the LAC.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

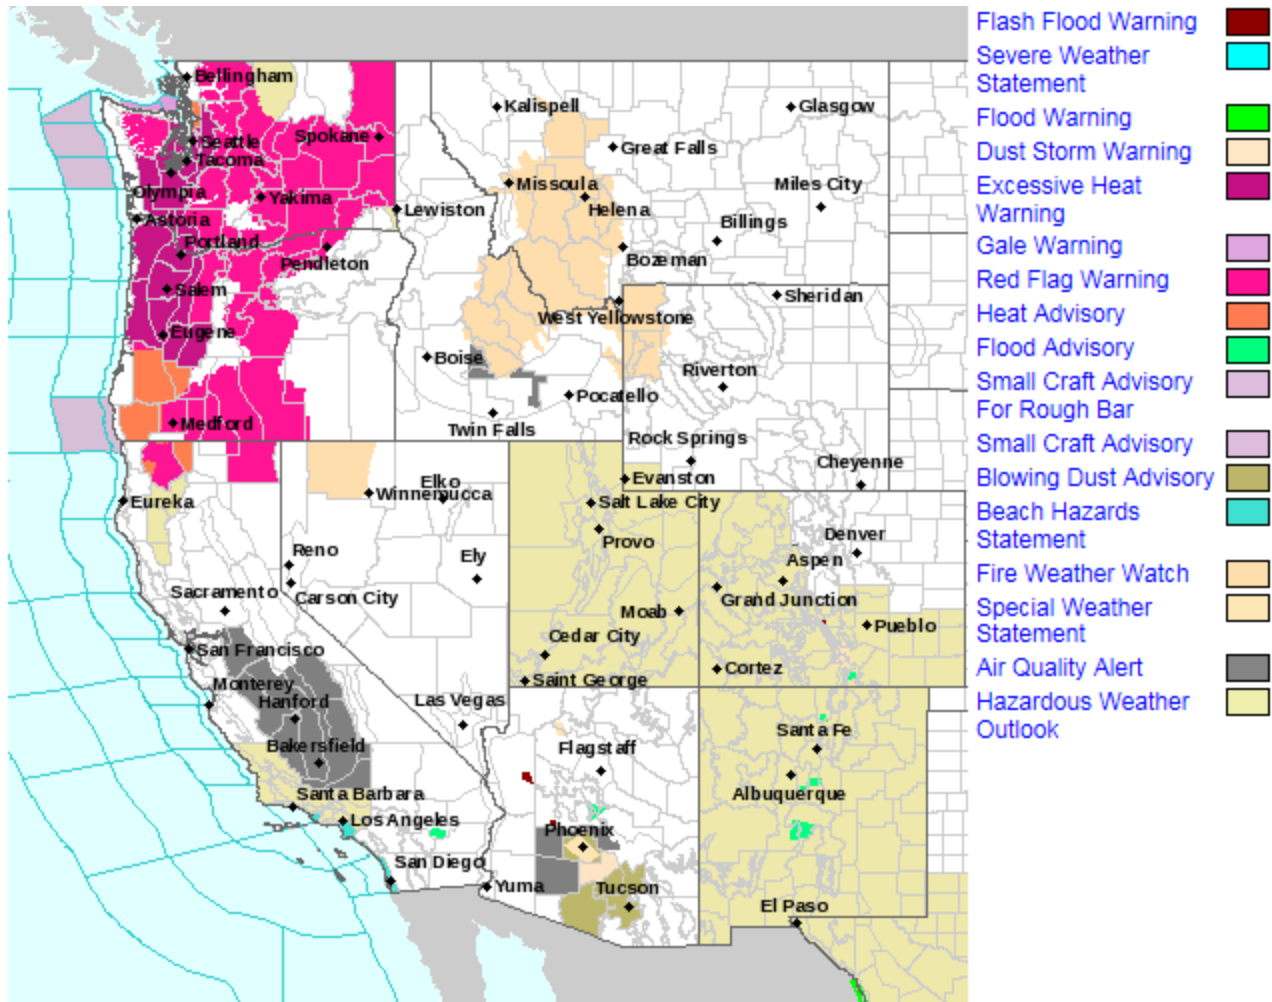

Thunderstorms possible over higher terrain each day through Monday, most numerous and widespread Sunday. SW to NW winds gusting to 20-30 MPH east of the cascade-sierra crest each afternoon through Tuesday. High pressure over the Northern California region will produce another hot and dry day today, while low pressure sits over Southern CA. Enough instability is present to set off a thunderstorm or two over the higher terrain this afternoon and evening. The high will weaken and move southeast and a low pressure trough will approach from the northwest on Sunday. Afternoon and evening thunderstorms will be more numerous over the higher terrain, but just about any location could see a stray thunderstorm. Even though these storms will produce some rainfall, dry strikes and new ignitions are possible. Due to the amount of lightning expected this is considered a High Risk event for the Northern Sierra and Far Eastside PSAs, where thunderstorm activity will also continue later into the evening. A final round of Northern California thunderstorms is expected on Monday in eastern areas, and the Far Eastside PSA will likely see more thunderstorm activity later in the day, so a High Risk symbol is posted there. Outflow winds from thunderstorms could gust to 50 mph. High pressure will push the moist unstable air off to the east Tuesday and Wednesday, and a new dry low pressure trough will develop overhead late in the week. Temperatures will continue to be around 10 degrees above normal in inland areas today, but drop to around 4-6 degrees above normal beginning Sunday. Overnight RH recovery will still remain between 30-45% for many areas, especially mid and upper slopes and away from the marine layer. The marine layer will continue at about 1200-1800 ft deep most days with daily overnight and morning low clouds and patchy fog pushing ashore furthest in the Humboldt Bay area and the greater Bay Area locations.

## **SOUTHERN CALIFORNIA**

Isolated to scattered thunderstorms over the mountains and deserts through Monday. A weak area of low pressure off Point Conception will bring isolated to scattered afternoon thunderstorms to the Sierra and to the mountains and deserts of Southern California east of the I-15 Corridor through Sunday. The low will push inland Monday continuing the thunderstorm activity across the Sierra and the deserts bordering Nevada, but dry southwest flow aloft will end the thunderstorm threat across Southern California. Temperatures will be near normal through Monday, with upper 70s and 80s across the mountains and upper 80s and 90s in the valleys. Minimum humidity will be mainly between 12% and 25% away from the coastal areas through Monday. A ridge of high pressure will build into California from the southwest bringing a brief warming and drying trend to the region Tuesday and Wednesday. A weak trough will drop south from Canada bringing near normal temperatures and a little higher humidity to the area once again late next week. Winds will be normal for this time of year, except there will be strong and erratic winds in and near any thunderstorms.
